# E-Glass

## Why use e-glass in the production of silencers?

The reason is clear. To ensure a better working environment for the employees, and at the same time optimize the functionality of products. It's an advantage in every respect.

## The advantages by using e-glass compared to alternative insulations:

### Production:

- Better fitment / Easy dosing
- Clean working environment

### Product:

- Improved noise reduction
- Reduction of surface temperature

The e-glass material is used in silencers that require noise and/or surface temperature reductions to meet OE specifications.

### Fact box

E-glass are small fibers with good properties in respect of sound absorptions, and thermal insulation.

Quality products from Dinex- Europe's leading supplier of complete exhaust system and emission technologies for commercial vehicles.
