Iveco Stralis Euro V Exhaust system

As a part of Dinex ongoing market information collection we have indentified the following points that has a high importance. Iveco Stralis Euro V OE exhaust sytem, which has covered 500,000 km has the following signs of exhaust system wear you should be aware of:

- **UREA LEAKAGE ➔ CHANGING CLAMP**
  Changing clamp ensures tight connection between pipe and silencer.

- **INSPECT PIPE ➔ MIXER DETERIORATION**
  A problem that could cause catalyst damage, because of not correct mixture of AdBlue and exhaust gases.
Material surface, which may be observed on OEM as well as replacement silencer. Rust is not going through, but only on surface. This has no influence on product performance.
