Dinex is continuously developing the EURO V exhaust program, and we can finally introduce the MAN front pipe with catalyst used on the MAN TGX series. The unit provides enhanced mixing properties for faster urea decomposition and uniform ammonia distribution. The new coated catalyst also improves the ammonia formation at low temperatures.

**Dinex no. 48156**
OE no. 51.15230.5019

**New Dinex EcoXcell® structure features:**
- Increased surface area
- More gas-to-surface contact
- More efficient operation

**EURO IV / V REPLACEMENT PARTS**
- Direct replacement of original Euro IV / V parts
- Stainless steel material
- Replacement parts are tested in Dinex Technology Center to ensure product functionality with respect to emission reduction, back pressure performance as well as noise reduction compliance
