Mercedes Benz – Vario
EURO IV SCR silencer

It is now possible to purchase our EURO IV silencer for Mercedes-Benz Vario utilizing the well-known SCR technology for superior emission reduction according to the European emission standards. The silencer is made from high grade materials, along with the SCR catalyst which is an in-house developed unit being produced in our own facilities to secure the best performance possible with regards to the reduction of NOx, particulate matter and other hazards.

Dinex no. 53303
OE no. 002.490.5914

Brackets and sensor ports are according to OE specifications
